

EISHA KAMRAN

Computer Science Graduate | AI & Data Science Researcher

✉ eishakamran313@gmail.com  linkedin.com/in/eisha313  Islamabad, Pakistan

RESEARCH INTERESTS

Machine Learning, Deep Learning, Computer Vision, Emotion Recognition, Natural Language Processing, Predictive Analytics, Data Mining, Neural Networks, and AI-driven Decision Systems. Passionate about developing intelligent systems that solve real-world problems through data-driven approaches and advanced machine learning algorithms.

EDUCATION

Bachelor of Science in Computer Science

Feb 2021 - Jan 2025

COMSATS University Islamabad

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Systems, Software Engineering, Object-Oriented Programming, Data Mining, Artificial Intelligence, Computer Vision, Statistical Analysis

F.Sc (Pre Medical)

August 2017 - May 2019

Punjab Group of Colleges F-8/4, Islamabad

TECHNICAL SKILLS

AI & Machine Learning: TensorFlow, Keras, Scikit-learn, PyTorch, CNN, RNN, Model Training & Evaluation

Computer Vision: OpenCV, Image Processing, Object Detection, YOLO, Facial Recognition

Data Science & Visualization: Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Statistical Analysis, EDA

Programming & Development: Python, JavaScript, TypeScript, Java, C++, React.js, Next.js, Node.js, RESTful APIs, Git

Project Management: Agile, Scrum, Technical Documentation, Requirements Analysis

RESEARCH & ACADEMIC PROJECTS

Human Emotion Detection using Deep Learning

Sep 2024 - Nov 2024

Independent Research Project

- Developed CNN using TensorFlow/Keras to classify 7 emotions from facial expressions, achieving 85% accuracy
- Built data preprocessing pipeline with OpenCV (face detection, normalization, augmentation) and deployed real-time system for live webcam feeds
- Evaluated model performance using confusion matrices, precision-recall metrics, and visualizations with Matplotlib/Seaborn

Customer Churn Prediction using Machine Learning

Jul 2024 - Sep 2024

Data Science Research Project

- Analyzed 50,000+ customer records, performed data cleaning and feature engineering using Pandas/NumPy
- Compared multiple ML algorithms (Logistic Regression, Random Forest, XGBoost, SVM) and achieved 82% accuracy with Random Forest
- Identified key churn factors through feature importance analysis and created interactive visualizations with Plotly

Real-time Object Detection System

Computer Vision Research Project

- Built real-time object detection system using OpenCV and pre-trained YOLO models for live video streams
- Optimized inference to achieve 25+ FPS and integrated bounding box visualization, confidence scoring, and multi-object tracking
- Deployed web-based interface for practical demonstration and testing

May 2024 - Jul 2024

Sales Forecasting and Business Intelligence Dashboard

Data Analytics Research Project

- Analyzed retail sales data using Pandas, conducted time series analysis to identify patterns and trends
- Implemented statistical forecasting models for sales predictions and created visualizations with Matplotlib/Seaborn
- Developed automated reporting system generating key business metrics and actionable insights

Mar 2024 - May 2024

PROFESSIONAL EXPERIENCE

Technical Project Manager

Axiom Consulting, California, United States (Remote)

- Lead technical project planning, execution, and delivery ensuring alignment with client requirements and technical specifications
- Coordinate cross-functional teams using Agile methodologies in Jira and create comprehensive technical documentation and project roadmaps
- Facilitate communication between stakeholders, clients, and development teams to ensure project success

Oct 2024 - Present

Frontend & AI Engineer

Quantum Edge, Islamabad

- Developed responsive web applications using React.js, Next.js with AI-powered features and integrated ML models/AI APIs
- Built real-time data visualization dashboards for AI predictions and RESTful API integrations connecting frontend with backend ML services
- Collaborated with data science teams to deploy AI models and create user-friendly interfaces for AI-driven applications

Apr 2023 - Aug 2024

Teaching Assistant - Software Engineering

COMSATS University Islamabad

Supervisor: Tehseen Riaz Abbasi

- Assisted in teaching Software Engineering concepts to 150+ undergraduate students and conducted assessment sessions
- Created supplementary learning materials and tutorials, graded assignments, and provided academic guidance
- Maintained academic records and managed student performance data on university systems

Jan 2024 - Dec 2024

CERTIFICATIONS & TRAINING

Agentic AI and AI Agents - Coursera	2025
Google Project Management Professional Certificate - Coursera	2025
Web Development Course - Coursera	2025
