

EISHA KAMRAN

Front End Engineer

+92 3155716313 @ eishakamran313@gmail.com linkedin.com/in/eisha313 github.com/Eisha313 Islamabad

SUMMARY

I am a highly skilled Front End Developer with a strong foundation in React.js, Next.js, and React Native, specializing in creating responsive and dynamic web and mobile applications. My expertise lies in utilizing the React ecosystem to build feature-rich interfaces, incorporating the latest tools like TypeScript and Tailwind CSS. With in-depth knowledge of advanced rendering techniques such as Server-Side Rendering (SSR), Static Site Generation (SSG), and Incremental Static Regeneration (ISR), I excel in optimizing performance and user experience. My hands-on experience in diverse projects showcases my ability to deliver seamless and engaging applications while effectively collaborating with cross-functional teams.

SKILLS

React.js	Next.js	SSR	SSG	ISR	Mantine UI	Material UI
Shadcn/ui	Daisy UI	Tailwind	Redux	Redux Toolkit		
Context API	TanStack Query	Fromik	React Hook Form			
Apex Charts	Nivo Charts	React Native	React Native Paper			
React Navigation	React Router DOM	HTML5	CSS3	Firebase		
RESTful APIs	JavaScript	TypeScript	Socket.io	Git	GitHub	
Vercel	Heroku	Netlify	Figma	Jira	Clickup	
Project Management	Technical Meetings	Google Maps				

PROJECTS

SkyNova

07/2023 - 12/2024 COMSATS Univeristy Islamabad

A project focused on developing VR solutions.

- Developing interactive and immersive user interfaces for the VR platform.
- Ensuring responsive design and cross-platform compatibility.
- Integrating real-time data and user feedback features.
- Collaborating with backend and VR teams to synchronize 3D flight experiences.

Food Hub

01/2024 - 06/2024 COMSATS University Islamabad

A semester project focusing on a food ordering app.

- Designed and implemented user interfaces for the Foodhub app in React Native.
- Developed responsive layouts for various devices.
- Integrated RESTful APIs for real-time data synchronization.
- Optimized app performance for smooth navigation.

LMS (Learning Management System)

01/2024 - 06/2024 COMSATS University Islamabad

A semester project focusing on a LMS for students and teachers.

- Developed a system to assign courses, quizzes, and assignments to students with set deadlines.
- Enabled students to view assigned courses, track current progress, and check their marks.
- Implemented features for instructors to manage course content and monitor student performance.
- Designed a dashboard for students and instructors to streamline course and assignment management.

EXPERIENCE

Technical Project Manager

Axiom Consulting

10/2024 - Present Irvine, United States

A US-based company specializing in IT solutions.

- Oversee the planning, execution, and delivery of technical projects, ensuring alignment with client requirements and business objectives.
- Coordinate cross-functional teams, including developers, designers, and QA, to ensure timely and high-quality project delivery.
- Manage project timelines, resources, and budgets, while proactively addressing risks and obstacles.
- Act as the primary point of contact between clients, stakeholders, and internal teams, ensuring clear communication and expectations.
- Track project progress, provide regular status updates, and ensure adherence to best practices and project management methodologies.

Front End Engineer (Intern)

Decimal Solution

01/2023 - 04/2023 Islamabad

A company specializing in IT solutions.

- Practiced integrating Google Maps tracking APIs into web applications.
- Developed and enhanced user interfaces for various projects.
- Collaborated with team members to implement and refine frontend features.
- Tested and debugged UI components to ensure smooth functionality.

EDUCATION

Bachelor of Science

COMSATS University Islamabad

02/2021 - 01/2025 Islamabad

F.Sc (Pre Medical)

Punjab Group of Colleges F-8/4 Islamabad

03/2017 - 03/2019 Islamabad

PROJECTS

Dine-in

📅 09/2023 - 12/2023 📍 COMSATS University Islamabad

A semester project focused on management of a restaurant for managing orders and inventory.

- **Developed** a system to manage menu items, including adding, editing, and removing dishes.
 - **Implemented** features for tracking food orders, managing inventory, and updating availability.
 - **Enabled** staff to view current orders, track preparation status, and mark orders as completed.
 - **Designed** a user-friendly dashboard for managing daily sales, inventory levels, and popular menu items.
-

Tele-Communication System

📅 02/2023 - 04/2023 📍 COMSATS University Islamabad

A semester project built in DSA course for learning and implementing different datastructures and algorithms.

- **Developed** a telecommunication network system enabling the addition/removal of customers and communication towers, with an admin-controlled interface for tower management.
 - **Implemented** advanced features to calculate the best communication routes using coordinates and graphs, ensuring optimal network quality and reduced message/call latency.
 - **Designed** a billing system to accurately compute charges for text messages and calls based on network usage and distance.
 - **Utilized data structures** like Minimum Cost Spanning Tree for route optimization, Priority Queue for message prioritization, BST for sorted data management, and Linked Lists for customer database maintenance.
-

Shopping Spree

📅 03/2022 - 04/2022 📍 COMSATS University Islamabad

A UI based project built in Java using OOP paradigm

- **Developed** an e-commerce platform for seamless product browsing.
 - **Designed** an admin dashboard to manage products, inventory, and orders.
 - **Implemented** a full fledged order cycle from cart management to delivery.
-

Airline Management System

📅 09/2021 - 11/2021 📍 COMSATS University Islamabad

A console-based airline management system built in Java.

- **Designed and implemented** a platform for browsing, booking, and canceling airline tickets.
- **Developed** features to manage and track booked and unbooked tickets, including flight cancellation options.
- **Built** an analytics module for monitoring revenues, profits, and losses.
